PX-0109

PX-0109

LAWSON

Key Features

Dozens of ready-to-deploy EDI "maps" delivered in formats used by leading suppliers (ANSI-standard), so you can begin trading more quickly with your preferred vendors

For many vendors, supports common transaction types such as Purchase Order (850), PO Acknowledgment (855), Advanced Ship Notice (856), Invoice (810), and Price/Catalog (832)
Flexibility to create new maps to other vendors

Link to your trading partners via standard dial-up connection through a value-added network (VAN) or over the internet

Ability to connect to industry-based exchanges such as GHX to reach multiple trading partners through a single connection

Use Lawson-delivered communication server or your preferred third-party communication software

Trading Partner List
